SURFACE & CORE

“WHY AQUAMARINE WATERPROOF”

AQUAMARINE - Inspired by mother nature and combined with the technology of science derives the creation of a *waterproof surface & core*; the plat-form of its DNA is a game changer on an international scale, the technological leader of choice when it comes to determining the type of waterproof flooring most suitable for any indoor application.

Without the use of any PVC plastic composites during manufacturing, which is commonly found in most alternative waterproof Hybrid flooring prod-ucts.

AQUAMARINE is an environmentally safe product as it is low in VOC’ s (Volatile Organic Compounds) which meets the European Standards, who hold the most stringent guidelines internationally. An effortless and easily maintainable flooring solution, lifelike in appearance that sounds and feels like real timber underfoot.

The surface wear layer is anti-scratch and embossed with a wood grain texture, providing for extreme wear resistance, thus the ideal product of choice for growing families. And let’s not forget our furry four-legged family members!
The product has a very impressive High-Definition (HD) film, providing a lifelike and real natural wood grain textured appearance in a matt finish which will enhance any interior flooring space whether it be a commercial or residential application.

Manufactured with a four-sided waxed Unilin 2G click system, it structurally makes installation effortless.

This *waterproof surface & core laminate* flooring is as unique as science itself. What separates this high-performance durable laminate from all other surface only water resistance laminates' is that ***AQUAMARINE HAS A WATERPROOF SURFACE & CORE WITH AN ADDITIONAL WATERPROOF HDF ECO-FRIENDLY WOODEN BASE***. As accidental liquid spills will occur, surely this clever *waterproof surface & core* would be the first and only choice when it comes to selecting a waterproof flooring.
Internationally, this *waterproof surface & core* has achieved growing market sales across Europe, USA, Canada, South Korea, Southeast Asia and Austra-lia, which reinforces the demands for this innovative *waterproof surface & core* product.

Therefore, **AQUAMARINE** makes *waterproof surface & core* the clear winner compared to alternative laminate flooring available on the market, such as the surface water resistance laminates or EU water resistance laminates.

AQUAMARINE ticks all the boxes providing peace of mind.
